TITLE	Nevada Education Statistics. EdTAB Report. School Enrollments, Teacher Salaries, Educational Expenses, University System & Faculty Ratios, Students Teacher Ratios.
INSTITUTION	Nevada State Dept. of Education, Carson City. Planning, Research and Evaluation Branch.
PUB DATE	Jan 95
NOTE	35p.; Material excerpted from State of Nevada, Department of Administration (1994) "Nevada Statistical Abstract." Titles, captions, and parts of tables may not reproduce well.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*Educational Finance; Educational Trends; *Elementary Secondary Education; *Enrollment; Federal Aid; Financial Support; *Higher Education; Hispanic Americans; Minority Groups; *Public Schools; *School Districts; School Statistics; State Aid; Tables (Data); Trend Analysis
IDENTIFIERS	*Nevada

ABSTRACT

Information about education in Nevada is presented in a series of tables and graphs. In 1993 public school enrollment had increased to 235,800, with much of the increase occurring in the last 5 years. Growth in the elementary grades outpaced growth in the secondary grades, largely because of an influx of young families into the state. In addition, the Hispanic enrollment in the state's public schools grew substantially. In 1982, 5.8% of the total school enrollment was Hispanic; in 1993, this figure had grown to 14.3%. The amount of public education funded by Federal and local sources has continued to increase, but the 1992 state level of funding of the public schools actually decreased from that of 1990 by about 2%. Local sources fund almost 60% of the state's public education. In 1993, Nevada ranked 35th in expenditures per student, at $4,590. Expenditures for the state's colleges and universities increased by almost 79% in the last decade, with most of this increase at the community college level. Increases in undergraduate registration fees have helped offset the rising costs. In fiscal year 1989-90, Nevada ranked 38th among the states in institutional expenditures per full-time-equivalent student for public institutions of higher education. (Contains 15 graphs and 33 tables.) (SLD)

PUBLIC SCHOOL ENROLLMENT

In 1983 Nevada's public enrollment was 151,104. By 1993 enrollment had jumped by over 50% to 235,800. A third of this increase came during the last five years. Much of the growth stemmed from new families moving into Nevada. But the age structure of the state drove elementary school enrollment through the roof. The 1970s saw relatively low birth rates. That showed up as a dearth of teenagers in the 1990 Census (see population chapter), and relatively small classes graduating from high school in the last decade. The 1980s saw a baby boomlet, which picked up steam as the decade wore on. As they entered kindergarten, the baby boomlet swelled elementary schools across the state.

With kids pouring in from below, and only a thin cohort graduating out the top, it's no surprise that growth in elementary schools outpaced the upper grades. That should swap in the next decade, as the baby boomlet moves into middle school and then into high school.

Elko county led the 17 counties in enrollment growth rates, growing by half. Eureka and Storey were close behind, each growing about 44%. Clark county was ranked 7th with approximately a 37% increase. Washoe county ranked 11th with a growth rate of only about 26%. Esmeralda and Mineral counties actually underwent a decrease in enrollment of 32% and 3% respectively.

The Hispanic enrollment in Nevada's public schools grew substantially over the last decade. In 1982, 5.8% of the state's total school enrollment was Hispanic. By 1993 this figure had grown to 14.3%.

PUBLIC EDUCATION EXPENDITURES

In Nevada the amount of public education funded by federal and local sources continues to increase. Conversely the state level funding of public schools has actually decreased by about 2% from 1990 at $415 million to $406 million in 1992. Local sources fund almost 60% of Nevada public education. Eureka County's schools are almost totally funded locally. At the other end of the spectrum, Lincoln County schools get 80% of their money from the state.

In 1993 Nevada ranked 35th in expenditures per student at $4,590. This was more than 13% below the national average.

HIGHER EDUCATION EXPENDITURES

During the last decade expenditures for Nevada's colleges and universities increased by almost 79%. Most of this increase occurred at the community college level. Nevada's expenditure per full time student equivalent (FTE) was $6790 in fiscal 1993.

Increases in resident undergraduate registration fees helped offset the rising costs. Since 1989 UNLV and UNR increased these fees by 45%. In 1994-95 the universities are charging undergraduates $58.00 a credit. In fiscal 89-90, Nevada ranked 38th among states in institutional expenditures per FTE student for public institutions.

TECHNICAL NOTES

College Entrance Exams: The American College Test (ACT) scoring scale runs for 1 to 36 and the Scholastic Aptitude Test (SAT) scale runs from 400 to 1,600. Each institution of higher learning sets its own minimum entrance standard.

Elementary: Kindergarten through sixth grade students enrolled in public schools.

Enrollment, Public and Private School: The number of registered students, from kindergarten through grade 12, including ungraded special education students in public and private schools.

Full Time Equivalent (FTE) Enrollment: Represents the effective number of full time students enrolled on a campus. For example, two students each taking half of a full credit load would count as one FTE.

Licensed Personnel: Teachers and other educational personnel employed by local school districts who hold valid elementary, secondary and/or special licenses granted by the Superintendent of Public Instruction.

National Rank: For consistency, all ranking begins with the largest figure.

Non-Teaching Licensed Personnel: Licensed personnel (administrative and supervisory staff) who do not provide instruction in the classroom.

NRS 388.490: States that at age 3 students with disabilities must be enrolled into appropriate special programs. The parent or guardian may avoid this early enrollment by demonstrating to the school district that the student is receiving an adequate education. These students while they are 3 and 4 years old are counted in the ungraded category. Later in their educational careers these students may either be counted in the ungraded category or at the grade level in which they are enrolled. Furthermore, NRS 388.490 establishes that gifted and talented students may enter the school system at age 4 and are therefore counted with the grade level in which they are enrolled.

NRS 388.700: NRS 388.700 was phased in beginning in 1991, reducing student teacher ratios in first and second grade, sometimes by reducing the number of pupils in a classroom, sometimes by adding a second teacher to a room.

Public Education: Public elementary and public secondary schools. Does not include colleges or universities.

Revenue Receipts: All receipts that become available during a school year. Does not include receipts used for repayment of principal and interest on long-term debt, and non-revenue receipts used largely for capital outlay expenditures.

Secondary: Seventh through twelfth grade students enrolled in public or private schools.

Special Education: Specialized instruction provided to students of all grades as needed, according to the assessment of a certified school psychologist or other professional.

Student-Teacher Ratio: Students enrolled per teacher. The tables provided by the audit staff of the Department of Education are weighted. The elementary ratios do not include teachers of art, music, physical education, special education, counselors, or librarians.

Teaching Personnel: Personnel who are licensed to provide instruction to students in the classroom.

Ungraded: Refers to a student who is enrolled in a preschool program or non-graded class in a school for special education, who cannot be assigned to a particular grade because of the nature of his or her condition (NRS 387.111).

1992-93	17,839	111,787	49,522	41,631	805	222,846	5.2%
1993-94	19,179	117,668	53,258	43,713	745	235,800	5.8%

a) The apparent decline in enrollment of ungraded students in 1982-83 and 1983-84 is the result of a change counting special education students. Prior to 1982-83, each district reported all full-time special education students as ungraded. In 1982-83 all districts, except Clark, reported the students in their appropriate grade level. Clark County made the change the following year.

b) Totals include those students in special education per NRS 388.490. (For further information on NRS 388.490 see the technical notes at the beginning of the chapter).

NOTE: Ethnic counts were collected biannually before school year 1987-1988 and were collected on or about December 1 of the reporting year. Beginning with school year 1988-1989, ethnic counts were requested on the same day as apportionment count day but were collected separately. The total ethnic enrollment may be different from the official apportionment enrollment. Clark County reported 1,250 students as other in 1988. These students were placed into the above five categories based upon the percentage distribution of all students. Percentage Change is from 1982-83 to 1993-94.

a) Clark County reported 1,250 students as "Other" in 1988. These students were placed into the above five categories based upon the percentage distribution of all students.

NOTE: Ethnic counts were collected biannually before school year 1987-1988 and were collected on or about December 1 of the reporting year. Beginning with school year 1988-1989, ethnic counts were requested on the same day as apportionment count day but were collected separately. The total ethnic enrollment may be different from the official enrollment.

a) A.C.T. Score is the American College Test Composite Score. See Technical note college entrance exams for scoring explanation.

b) S.A.T. is the Scholastic Aptitude Test. For an explanation on the scoring system, see "College Entrance Exams" in the technical notes at the beginning of this chapter.

c) Reflects the percentage of the test takers to the total number of 12th graders.

d) Figures may not total due to the reporting procedures.

e) White Pine had not reported the test results for 1993 at the time of publication.

NOTE: Data for teaching and non-teaching personnel reflect head count rather than full-time equivalency. For more information on class size reduction see NRS 388.700 in the technical notes at the beginning of this chapter. The Nevada Department of Education only compares data over a ten year span. Collecting procedures and requirements change and therefore comparisons over ten years are not good.
